

Grand Marcell

Frontend Developer · React · Next.js · TypeScript

08872059062 · grand1310marcell@gmail.com · linkedin.com/in/grandmarcell · grand-porto.netlify.app · Tangerang, Indonesia

SUMMARY

Frontend Developer with 3.5 years of commercial experience building production UIs at a dental healthtech startup and a product agency. Specialises in React, Next.js, and TypeScript. Delivered a 7-module internal procurement system from scratch over six months, migrating manual spreadsheet workflows to a structured web application used daily by operations staff. Comfortable owning full features end-to-end — from Figma handoff through backend integration to deployment. Values clean, maintainable code that new engineers can read without a walkthrough.

TECHNICAL SKILLS

Frontend: React.js · Next.js · TypeScript · JavaScript (ES6+) · Tailwind CSS · Zustand · React Query · Shadcn/ui

Backend & DB: Node.js · Prisma ORM · PostgreSQL · Supabase · REST APIs

Tooling: Git · Docker · Nginx · Figma · Scrum/Agile

Languages: Indonesian (Native) · English (Full Professional) · Dutch (Elementary)

EXPERIENCE

Full Stack Engineer

July 2024 – Present

Rata.id · South Jakarta

Rata.id is a dental healthtech company building software to support aligner treatment workflows for patients and clinical staff.

- Led the frontend build of a 7-module internal procurement system — covering purchase requests, quotation comparison, purchase orders, payment requests, proof of delivery, item management, and vendor management — migrating the full workflow from spreadsheets to a structured web app over six months while maintaining existing tooling in parallel.
- Own the frontend across multiple product areas: procurement, scheduling, and a clinical review module where dentists flag aligner sets and tooth examinations for re-examination.
- Refactored 5–6 large god components into single-responsibility units — including a complex data table with individual column filters — improving codebase readability for new engineers.
- Collaborate with in-house UI/UX designer on Figma handoffs and participate in team-wide code reviews.

IT & Frontend Developer (Side Project)

Aug 2020 – Present

GPIB Yudea · Tangerang

- Built and maintain a full-stack scheduling and multimedia app for the church community using Next.js, Prisma, and Supabase — actively used in production.
- Integrated a Google Gemini AI chatbot into the app via a Prisma-connected API route that injects upcoming event context into the system prompt.
- Managed AV and live-streaming production for weekly worship services across 100+ consecutive sessions, maintaining a near-zero failure rate.

Frontend Developer

Oct 2022 – July 2024

Merkle Innovation · Jakarta

Merkle Innovation is a product agency building custom software for enterprise clients across Indonesia.

- Joined as intern, promoted to full-time Frontend Developer based on performance within a 3-person frontend team.
- Contributed to the Siloam Hospitals management system — one of Indonesia's largest private hospital networks — building and maintaining 4 core modules: inpatient, outpatient, doctor management, and pharmacy.

- Defined reusable component patterns adopted across the team and established responsive design standards. Consistently delivered pixel-accurate implementations on schedule.

Administrative Officer

Mar 2021 – Feb 2023

Universitas Pelita Harapan · Tangerang

- Managed survey data for student satisfaction and graduate outcomes; supported institutional accreditation processes as part of a scholarship bond obligation.

EDUCATION

Bachelor's Degree, Information Technology

2017 – 2021

Universitas Pelita Harapan

CERTIFICATIONS

- Responsive Web Design — freeCodeCamp
- Membuat Website dengan ReactJS — Dicoding
- C++ Programming & Python Programming
